Why I would be a good candidate for a Board of Director position:

- As a current board member I have gained working experience and understanding of the issues facing CMWC. If elected I will provide continuity to the Board and support and guidance to CMWC to ensure safe and reliable culinary water and economical service to the shareholders while meeting the challenges of continuing community growth and development.
- I am independent and not associated with nor aligned with any individuals, groups, parties or movements.
- I have no agenda other than to have CMWC operate in a manner to meet the needs of all shareholders as economically and equitably as possible and to be prepared for the future.
- I have 35 years experience working in the water delivery industry including:
 - Intense and rapid rural to urban growth and development
 - Water rights and contracts
 - Dam and river operation
 - Canal, lateral and pipeline operation construction and maintenance
 - Deepwell and booster pump operation and maintenance
 - Regulatory, environmental compliance and reporting
 - Shareholder customer service
 - Intergovernmental agency and stakeholder relationships
